CURRENTLY ADVERTISED PARTS/SERVICES APPLICABLE TO EARLY ECONOLINES

IMAGE One of sometimes several Ford Truck Parts Catalog Illustrations displaying the listed line item. A period follows image numbers when more than one Ford Truck Parts Catalog Illustration displays the listed line item. SEQ sells a Xeroxed set (over 125 pages) of all the Ford Truck Parts Illustrations applicable to 61-67 Econolines. See the below listing of "Miscellaneous Items Not Identifiable by Ford Part Numbers."

FORD PART NUMBER When a two digit number immediately precedes the blank space before the Group-Suffix code, it identifies the part as a Body or Soft Trim item. Ford Part Numbers whose prefix starts with C1U thru C7U, were originally designed for use on 61-67 Econolines, and all other listed Ford part numbers identify the part as an "interchange item" that is also used by other Ford Marques and/or model years. When a "dash S" follows the group code, the line item is a Standard Utility Hardware Item, none of which employ a prefix.

YEAR Econoline model year applications.

DESCRIPTION Words that are not from the descriptive text in Ford Parts Catalogs are not capitalized.

PRICES The most recently advertised prices are shown nearest the description and all are: (a) subject to change without notice, (b) less shipping-handling-applicable taxes, (c) rounded off to the nearest whole dollar, (d) for only one item unless a numeric quantity and an "at" symbol (e.g., 2@) precede the dollar sign.

TYPE ITEM/SERVICE SYMBOLS: * NOS, . NORS, : AFTERMARKET GENERIC/CUSTOM SUBSTITUTE ITEM, ■ = [{} REBUILT (without core charge), □ = [{} REBUILT (with additional core charge), ; SPEED EQUIPMENT, * RESTORATION AND/OR REPAIR SERVICES & ESTIMATES, ◇ CUSTOM FABRICATION SERVICES & ESTIMATES, ^ USED.

VENDOR ID CODES are indexed on SEQ's mailing label page, and are shown below in lower case letters whenever the vendor doesn't specifically advertise the Ford Part Numbered item as being applicable to 61-67 Econolines. When a vendor's ordering symbol differs from the displayed Ford Parts Catalog Number, the vendor's identification code is shown immediately followed by an underline symbol and if space permits the vendor's known peculiar ordering symbols are also shown immediately following the underline symbol.
